

IntelliROL® - HDR Curve

High Density Roller (HDR)

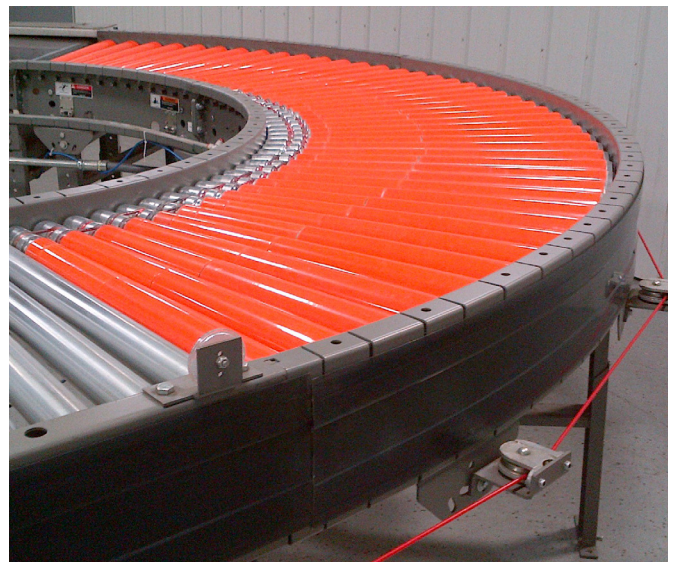

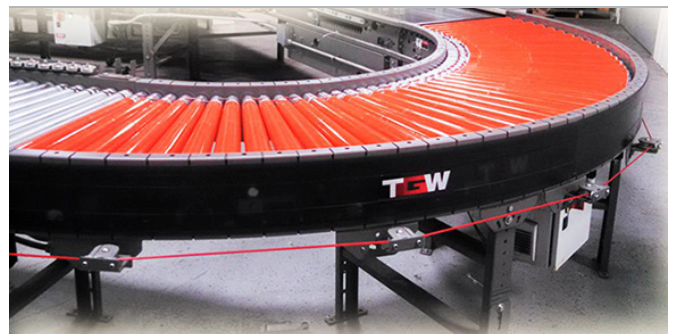

The new TGW 30 roller – 90 degree - MDR curve – successfully handles poly-bags...and is about HALF THE PRICE OF A BELT CURVE!

E-Commerce, e-Distribution and Direct to Consumer...all terms we hear every day, but the small orders, shipped in small poly-bags are a growing problem for traditional conveyor or/material handling systems.

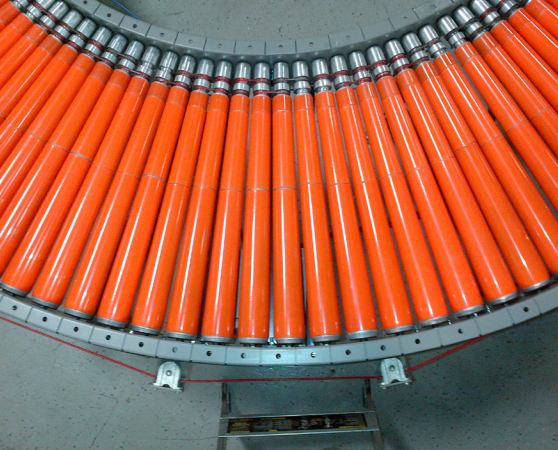

TGW has taken a lead role within the industry, with the development of solutions for handling poly-bag packaged products. Our IntelliROL belted MDR (Motor Driven Roller) are proving to be a perfect fit. The challenge has always been handling poly-bags in the curves.

Until now, the standard solution has been to purchase belted curves. The high costs of these belted curves with a good ROI, has caused many projects to slip into the pile of projects, or were not implemented because of cost.

TGW has developed a product that is both simple and better value...a 30 roller MDR style 90 degree curve with tapered rollers. It has very tight roller centers and sleeved rollers.

Curves are shown with optional PVC coated rollers

IntelliROL® - HDR Curve

FEATURES:	BENEFITS:
Run-on-demand	Quiet operation, low energy consumption
Few moving parts	Reduced maintenance cost, less noise
Many proven accessories	Rapid start-up, reliability
Low profile	Application-specific
Standard modular construction	Minimal space requirements
Unique frame design	System easily reconfigurable
Electronic sensing	Total electronic component protection
Pre-mounted and pre-wired electrical components	No minimum weight restriction
Full Width Belted Zone	Economical, easy installation
Decline Belt ITR Accumulation	Minimal gaps. Easy conveyance of smaller items.
	Plug and Play network with ITR family

TGW Systems is a worldwide leading supplier of highly dynamic automated equipment used to transport a wide variety of products. TGW Systems manufactures one of the industry's highest quality conveyor and sortation technologies which are sold through a network of factory trained authorized Distributors, who partner with TGW Systems to strengthen their efforts of providing a complete integrated logistical package that meets the end user's needs.
